RE: New Stone Wall
220 Nod Hill Road
Wilton, CT
Our Job No.: 21-07

Dear Mr. Behrens:

At your request I made a visit to your residence, as referenced above, on March 1, 2021, to review the construction of a newly built stone wall which replaced an old rubble stone wall. The new stone wall is about 186 feet long and is located between your house and the lake below. The existing slope of the ground and the lake is about 15 degrees downward towards the lake.

The rebuilt stone wall is from 2 ft. to 4 ft. high and is about 1'-8" thick at the top and built of mortared stone. The sides are vertical.

The wall is structurally safe and well built.

If you have any questions regarding the content of this report, give me a call.

Respectfully submitted,

Arne Thune, P.E.
