Re: Inland Wetlands Application  
141 Danbury Road, Wilton, CT

Dear Members of the Commission:

ELS has reviewed the project letter prepared by Tighe & Bond (T&B), dated August 10, 2021, that responds to staff comments for WET#2714(S). Many of the staff comments focused on sedimentation and erosion controls during construction. The T&B letter references plans that include the sedimentation and erosion during the construction phase and emphasizes a comprehensive site plan approach that will protect the Norwalk River and its floodplain wetlands from potential short-term sedimentation and erosion impacts during construction. When these controls are installed and maintained according to the plans prepared by T&B, ELS concurs that no potential short-term construction related impacts to the river or wetlands are anticipated. As previously noted, in the long term, the positive impact to the wetlands & river will be substantial.

Sincerely,

A handwritten signature in black ink, appearing to read "Kate Throckmorton", written over a horizontal line.
