Subject: RE: Morron Application for Inland Wetlands Minor Permit for buried propane tank

Liz,
Thank you. After receiving a phone call from the Town Friday midday, just before I was flying out of town, I hustled to prepare the filings by email and the Town later that day, with check. Although surprised at the requirement, I was and am thankful to Mr. Herter for his help so that I was able to get it done before I left for two weeks. This notification was also a surprise, and I understand from the attached "Addendum" and your note that it must be by certified letter (and the Addendum indicates by this Friday). I can prepare a letter reciting what the Addendum states in the third paragraph, and I will include a paper copy of every document I've filed with the Town to date. Of course, being out of Town with no advance notice of the Addendum requirement, I can't get to Town Hall for the project plan. If my earlier documents do not include that, and you have whatever that is and can send a copy to me by email, that would be helpful, thanks. If that's not feasible, fortunately the submission doesn't require it.
I will call you tomorrow morning to fill in my understanding of these points and get a head start on any other requirements upcoming.
Thanks,
Kelly Morron

Hi Kelly,

Paragraph 1 on the attached clearly states the mailing should be certified for the Water Company.

The Dept. of Public Health submission on the bottom portion is via email.

Please call me if this is not clear on the attached.

Thank you,
Liz

Ms. Larkin,
Thanks. I'm confused about the requirement for certified mailing, since the attached form states that they prefer website submission. Is certified mailing a Town requirement or preference; would copy of electronic submission not work?
Thanks,
Kelly Morron

Hi Kelly,

Thank you for your message. I confirm receipt of the paper and electronic versions of your Inland Wetlands Permit Application.

I have confirmed that you are in fact within the "First Taxing District Watershed". As such, you are required to send notification to them to advise of your proposal. I have attached the form that explains what you need to do. It is best to have the certified mail "green card" sent back to me here at 238 Danbury Road in Wilton, CT for our files. We provide the water company with 5 days from the date of their signature to stop the permit process. If we do not hear from them within 5 days, we can consider the permit.

Thanks again,

Liz Larkin

Secretary, Environmental Affairs

Mr. Conklin and Ms. Larkin,

I attach an application for a minor permit to bury a new propane tank in conjunction with my previous (4/29/21) application for permit for placement of a generator. I attach the three required documents, and will submit paper copies with \$210. Check.

Thanks,

Kelly Morron
