RE: 150 Cannon Road – Native Shrubs, Vine and Perennial Planting

Dear Zen,

I am pleased to file my minor application for the native species beautification project I would like to do on my property. We moved into 150 Cannon Road in December of 2020. The area I want to improve was neglected for years and is now over grown with grasses and oriental bittersweet, the latter which has overgrown many of the nearby trees and wetland plants. The area currently is unsightly but, has the potential to become a beautiful, natural habitat for a range of insects, birds and other animals.

My plan is to cut back the overgrown grass and remove the oriental bitter sweet and damaged bushes in the shaded the area on the attached location map. I will plant shrubs, vines and perennials that are native to Connecticut to create the habitat. Attached is a list and number of shrubs, vines and perennials I will plant in the wetlands. There will be no excavating, mulching or grading in the wetlands. The only change will be planting native plants.

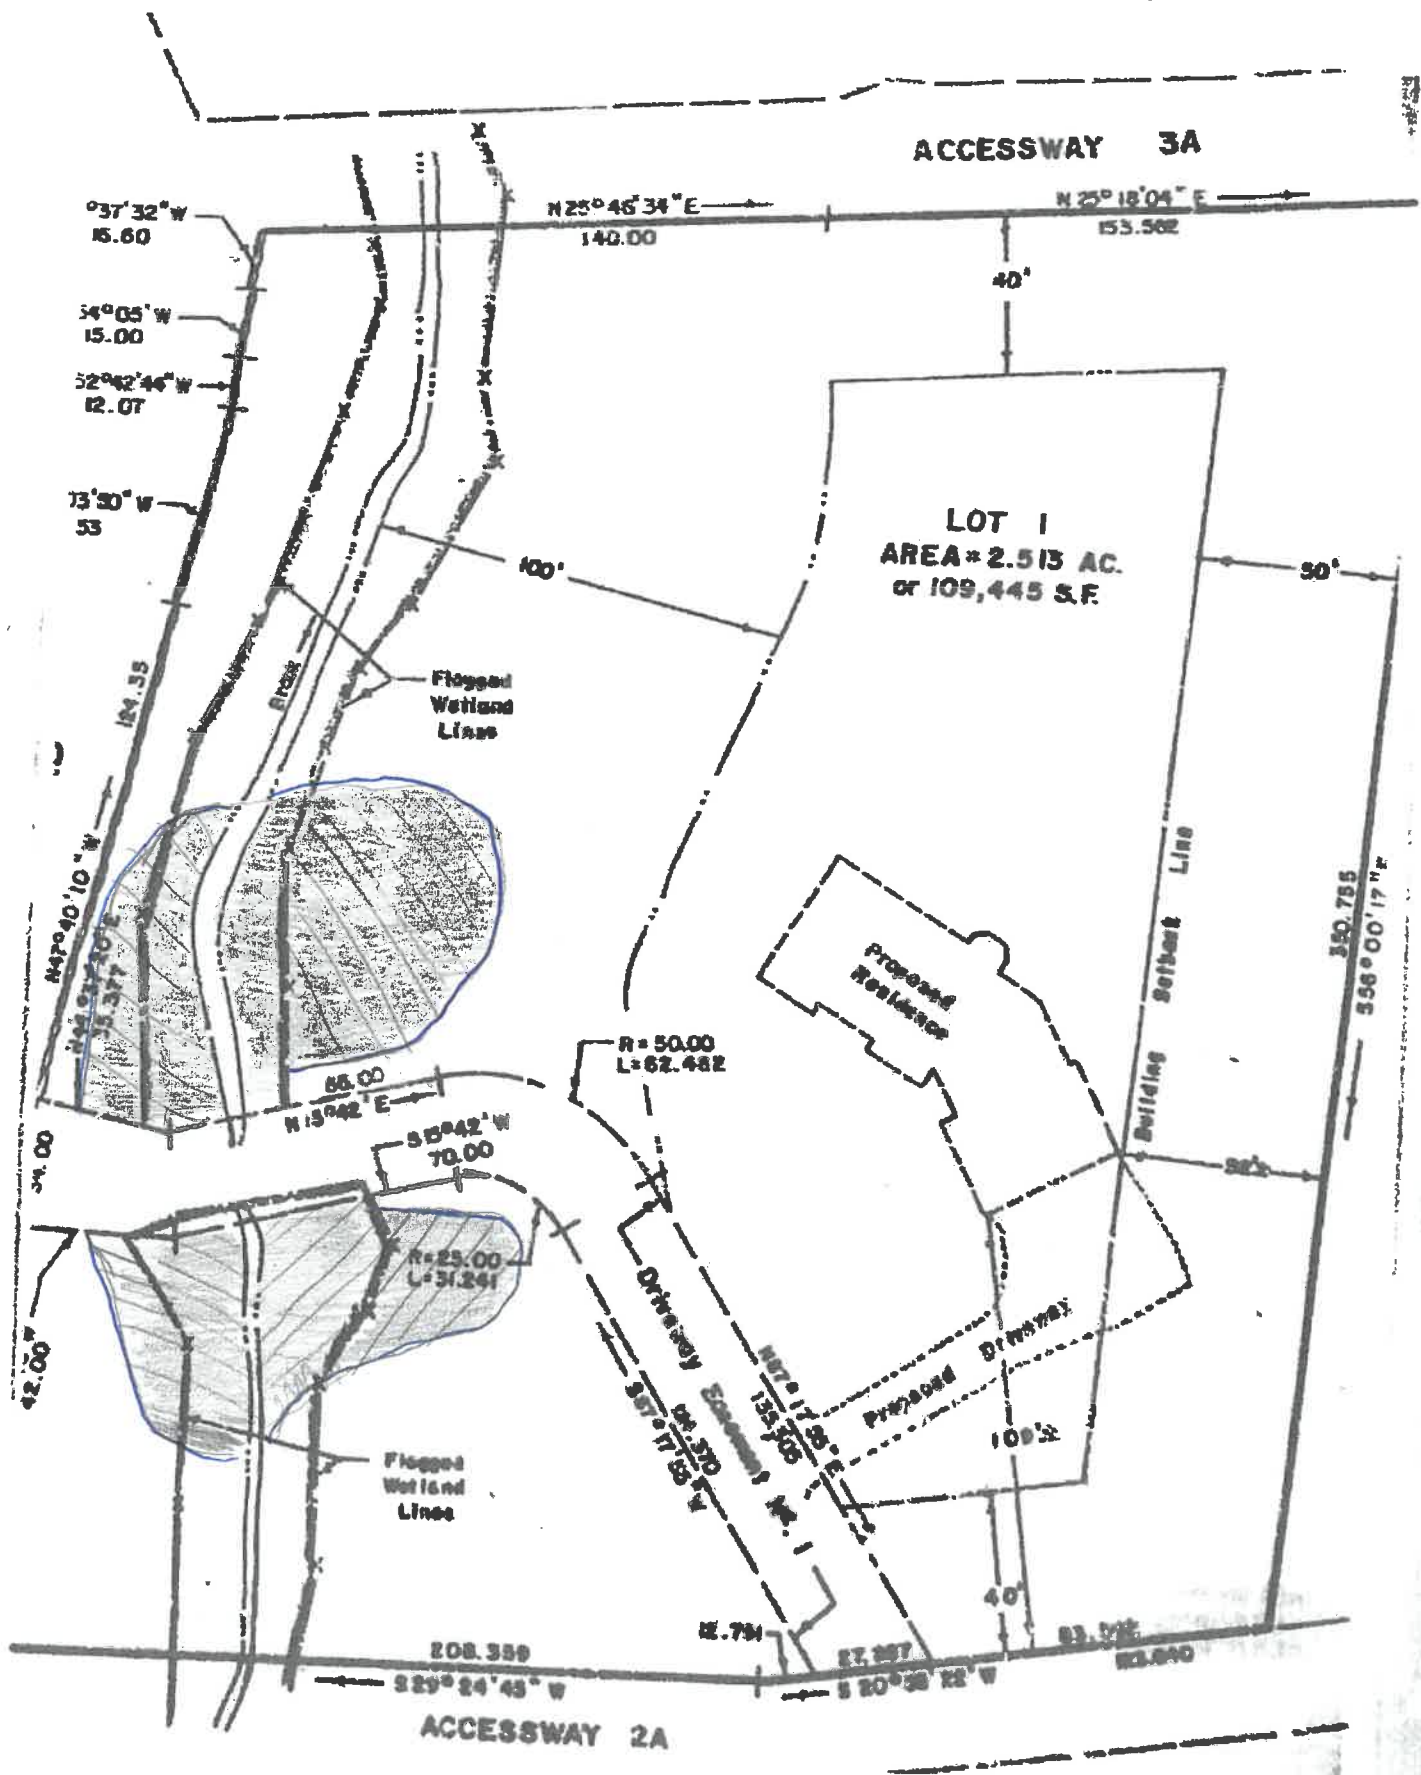

After the project is complete, I will maintain the landscaping to prevent invasive species from overgrowing the plants and area again. I would like to begin clearing the overgrowth this fall, so I can plant in the spring.

Thank you for your attention to this project. Please let me know if you have any questions or need any other information from me.

Regards,

Christopher J. Odyniec
