Hello Mike and Zen,

I hope you are well.

We wanted to provide a project update for 573 Nod Hill Road, and request an extension. The wetlands were flagged by Steven Danzer PhD & Associates on March 24, 2023. We are now waiting for the surveyor to locate the wetland line, and add it to the survey. The field work is tentatively scheduled for April 22-23rd, then we assume he will need another couple weeks to update the map.

The current deadline is April 17th. We'd like to request another month, or even two months, if the Board would be willing to extend it further, since we are subject to the surveyor's schedule.

Please let us know if this is acceptable, and if you need further documentation to request the extension.

Many thanks.

Hello Mike and Zen,

Mr. Valentin, of 573 Nod Hill Road, has retained my services to prepare the Intermediate Corrective Action application required by the Inland Wetlands Commission. A wetland scientist has also been retained to delineate the wetlands and provide the soils report. We intend on prioritizing this application, however our progress is subject to the surveyor's schedule. We will be in touch soon to apprise you of our progress, and based on scheduling, may need to request an extension.

Thank you.
