Subject: Generator for Wilton Congregational Church

CAUTION: This email came from outside the Town network. Is it authentic? Don't click until you are sure.

Michael, Attached are the architectural drawings showing the modifications to install the generator inside the Church and the noise report. We received Historic Commission approval for the Chimney and tentative approval for the intake louver on the back of the Church. They would like to see the louver installed to decide if they want a screen in front of it. Also attached is the latest site plan which does not show the window wells underneath the handicap ramp. The permit has been filed by Petretti & Associates, the General Contractor, we just want to make sure there is no zoning issue. I will send you the mechanical, electrical and electrical drawings seperately. Let me know if you need anything else so we can get back to the building department. Regards

Gifford Broderick
