Attn: Ms. Daphne White
Planning & Zoning Commission

Mobil
46 Danbury Road
Wilton, CT 06897
Delivery: Email

Dear Ms. White,

Enclosed please find (1) one set of drawings of the proposed synergy components for the existing gas station located at 46 Danbury Road, Wilton, CT. The site has an existing Special Permit from the Planning & Zoning Commission so we need to have the application reviewed by them. The owner proposes to install (2) two waves, (2) two blades **all with no text**, (4) four koala's and (8) eight number wedges at the fuel dispensing area. The waves, blades and koalas are all part of Mobil's new "Synergy" brand of fuel, which is gasoline engineered with 7 key ingredients, to help you get better gas mileage and is now available at Mobil and Exxon gas stations worldwide. The number wedges are lane designations for the patrons and are directional which should be allowed by right. Mobil is taking the info (dispenser numbers, no smoking, turn off your engine etc.) off the dispensers and putting it on the columns in the koala's and number wedges. We also understand that there are (2) two "Mobil" canopy logo's that were installed BUT not permitted, we wish to discuss possibly maintaining these signs. Lastly, we have enclosed the owner authorization letter allowing me to file this application. The site is in a commercial area (Zone DE-5) with office buildings and businesses all around us and the addition of the synergy components would not change the area architecture and since we have removed the text, they are not considered signage.

We wish to be heard at the January 23, 2023 Planning & Zoning Commission meeting. Please review the enclosed information and if you have any questions or need additional information, please do not hesitate to call me at (774) 239-2781. Thank you in advance for your time in helping to expedite this matter.

Sincerely,

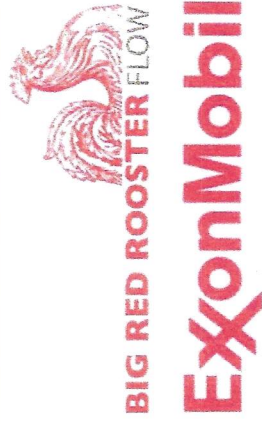

Carolyn A. Parker
