MEMORANDUM

TO: Daphne White, Assistant Town Planner

FROM: Frank Smeriglio, PE, - Assistant Director of Public Works/Town Engineer *FS*

CC: Michael Wrinn - Director of Planning & Land Use Management
Charlie Taney – President (Friends of the NRVV)

DATE: September 3, 2020

RE: **SDP – Friends of Norwalk River Valley Trail –
Proposed two new trail sections**

Based on the review of the above mentioned plans, the Department of Public Works have been working with Friends of Norwalk River Valley Trail on the plans for this project. Comments have been coordinated directly with their Design Engineer regarding drawings, specifications and contract language. Below are comments given to their Design Engineer that may also pertain to Planning & Zoning.

1. Portion of the parking on Chipmunk needs to be paved in the Town Right of Way. Entrance must have a 5% positive pitch towards the road for approx. 8 feet to prevent road runoff from entering the parking area.
2. On Chipmunk Lane, there are catch basins that drain east towards the trail. Please verify if there needs to be additional culvert crossings at the trail to accommodate the water flow.

If you have any questions, please do not hesitate to call.
