# WILTON BOARD OF ASSESSMENT APPEALS APPLICATION

REAL ESTATE	
	C PIACE

October 1, 2019 Grand List

Pursuant to CT General Statues Section 12-111, BAA applications must be <u>**RECEIVED**</u> by the Assessor's Office no later than <u>March 20, 2020.</u>

. . .

	Owner's Information:
Property Owner(s): M,	JHAMMAD U. ZAHID SABA T. ZAHID
Property Owner will be represer	
	nt is used a signed authorization form from the property owner is required.
	Correspondence:
Name of Person and	Address to which all BAA notices and correspondence will be sent (list one only):
Name:	MUHAMMAD U. ZAHD
Address:	89 GRUMINIAN HILL ROAD
	WILTON CT 06897
Phone:	646-334-3132
	Description of Property Being Appealed:
	NOTE: One application per property being appealed
Map: Lot	: Account #: 074420
Property Location:	89 GRUMMAN HILL ROAD
Property Type: R	Residential: Commercial:
	Reason for Appeal:
Describe your reason for appeal	: (Attach additional pages if necessary)

Freddie Mac Form 70 March 2005

UAD Version 9/2011 Page 3 of 6

Fannie Mae Form 1004 March 2005

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Fannie Mae Form 1004 March 2005

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

#### Uniform Residential Appraisal Report

File # 0565453933

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Freddie Mac Form 70 March 2005

UAD Version 9/2011

 	A		
justments		ienn	III m

Borrower/Client	Saba Zahid, Muhammad Zahid							
Property Address	89 Grumman Hill Rd							
City	Wilton	County	Fairfield	State	СТ	Zip Code	06897	
Lender	Wells Fargo Mortgage							

File No. 0565453933

All adjustments are based on paired data analyses using area sales over a period of one year to support the direct comparison approach. Peer review and industry interviews are also conducted to support findings. Sensitivity testing and price per square foot analyses are consulted as tertiary metrics. These are all considered to be credible sources of data for the valuation metrics utilized in the assignment.

The terms 'subject market' and 'the market' refer to properties that would be considered competing units by an educated buyer.

-Gross living area adjustments are reasonable at \$35 psf for differences over 100 sf based on a 15% contribution of the living area by the average ppsf of competing units. Finished basements are adjusted between \$10-\$20 psf based on the estimated ppsf contribution which will include basement baths. Baths and central air are adjusted for the estimated recaptured cost to create parity or \$10,000 for a full bath, \$5,000 for half bath, and \$7,500 for the average of all cooling options available in the market.

-Quality and condition are found to contribute between 5-10% depending on the level of finish and adjustments are applied accordingly. This is representative of the impact in the market and how differences are recognized by market participants and also is an approximation of the recaptured cost to create parity. Adjustments will be mitigated to 2.5% when the difference is less significant but still impactful. Quality and condition ratings were created for the purpose of UAD formatting for XML reports. The ratings are not intended to remove the perception of a range. Units with the same quality or condition rating may still experience an adjustment when there is an inferior or superior feature that is expected to impact value. The difference will be noted in the individual comparable description.

-The industry scale for amenities in the market is between 1-10% depending on quality, utility, and condition. Pools contribute between 1-3% based on quality, condition, and utility.

Features that don't translate to a benefit for the seller will not experience an adjustment. These are:

-The contributory value of the site is driven by utility and appeal as well as size and adjustments are only applied when appropriate regardless of the size difference. Adjustments are applied only when comparative analysis and familiarity with industry participants indicates an impact.

-No time of sale adjustments were necessary based on a review of competing units in the market this past year.

-There is no majority style preference in the market and buyers will consider all available units in the price range.

-Room and bedroom count is considered within the gross living area and no individual adjustments are warranted.

-Decks, porches, and patios are viewed as similar on balance in the market and no adjustments for these differences are necessary. Quantity adjustments will be explained in the comparable section when utilized.

Effective age denotes the difference between economic life and remaining economic life of the structure. The age is
evident by the condition of the structure. The level of maintenance employed by owners or occupants responsible for
maintenance influences the effective age of a building. If a building is well maintained, the effective age of the building will
be less than its actual age. Significant differences in effective age will be recognized by using a condition adjustment.

-Legal non-conforming lots may be present in comparables and are common and accepted in the market and there is no measurable financial difference provided the parcel supports the improvements.

-Bracketing: The appraiser uses bracketing to determine a probable range of values by applying qualitative techniques of comparative analysis to a group of comparable sales. The sales chosen were considered by the appraiser to be the best available, notwithstanding the characteristics that were not bracketed. If it is determined that these characteristics impact value and or marketability, an adjustment will be applied. Sales to the South are considered in the analyses but none are better examples of substitute units due mainly to the geography of the market area:Not adverse.

-Summary and Reconciliation: Additional support for the value opinion is confirmed by the weighted average method and the order is described in the individual comparable unit comment in the comparable section which describes the reason each unit was displayed as an example of the principle of substitution, as well as the reason behind the order of consideration. In reconciling the final opinion of value, all sales are considered in the weighted average method which multiplies each component by the corresponding factor reflecting its importance, resulting in a benchmark that supports the adjusted value range and is considered along with available properties.

**Supplemental Addendum** 

Borrower/Client	Saba Zahid, Muhammad Zahid							
Property Address	89 Grumman Hill Rd							
City	Wilton	County	Fairfield	State	СТ	Zip Code	06897	
Lender	Wells Fargo Mortgage							

File No. 0565453933

Addendum: This addendum and all other exhibits and supplemental data are intended to be incorporated with this appraisal report and made a part thereof.

#### The address on the order is 89 Grumman HI. The legal address is 89 Grumman Hill Road and USPS recognizes 89 Grumman Hill Rd, Wilton, CT. The USPS print out is attached.

Revision 12/19/2019: The client has supplied a Collateral Analytics Complexity Profiler that includes the legal description in the format preferred by the lender. The legal description is too long for page one and has been attached as an exhibit in the report. It is reasonable to assume that this is an acceptable legal description and the appraiser reserves the right to revise if this proves to be false. The signature date has changed from 12/18/2019 to 12/19/2019. No other changes have been made to the report. End revision comments.

Definition of Market Value: Defined by The Appraisal Institute in The Appraisal of Real Estate, 13th Ed., p.23 as: "The most probable price, as of a specified date, in cash, or in terms equivalent to cash, or in other precisely revealed terms, for which the specified property rights should sell after reasonable exposure in a competitive market under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, and for self-interest, and assuming that neither is under undue duress.

Extraordinary Assumptions Employed: These assumptions are directly related to this assignment as of the effective date of the appraisal report, and are based on reasonable information available to the appraiser.

-The comparable sales used in this report, while confirmed with reliable sources, may contain information that is considered confidential and not generally made available to parties outside the transaction. The values herein are based on the assumption that the data reported to the sources used reflects an accurate description of the transaction. -The information promulgated by the Wilton assessor is accurate.

-The subject meets the criteria for a C3 condition rating

If any or all of these assumptions are found to be false, it may alter the results of the appraisal

Severe Weather Events: As of the effective date of this appraisal, there was no evidence of observable adverse effects caused by the severe weather events common in the Northeastern United States.

Location Information: Grumman Hill Rd is a lined road and the subject is set well back with topography buffers so there is no noise or view impact from the road which experiences a relatively low to moderate volume of traffic only. No adjustment for side road is necessary as the subject's site makes it similar on balance.

#### Appraiser Comments and Acknowledgements:

-The appraised value is an opinion formed after research and analysis of relevant data. It is not intended to meet or match a sale price. It is not unusual for an appraiser's opinion of value to be different from the purchase price in a transaction: Intangible factors like buyer and seller motivation, agent experience, negotiation tactics, for example, cannot always be quantified mathematically. The appraiser provides a range of value in the summary and uses industry approved methodology to present the most probable value in the space provided by the secondary market forms. Therefore, a value opinion within a reasonable range of the purchase price should not be considered an adverse assignment result.

-Original Photographs: The appraiser uses original photos taken at the time of discovery. The discovery can be when the property is listed, at the time of sale, or upon discovering the property during research for an assignment. Photographs taken at or near the time of sale are most representative of the comparable as intended. If the improvements have changed since the time of marketing and sale, or are obscured by natural or man-made obstacles, the appraiser will include an MLS or assessor photo for review. If there are children in the vicinity, people in the yard, or another situation where it would be inappropriate to take a picture, the appraiser will comment in the comparable explanation and include a MLS or assessor photo for review.

-Public Record Discrepancies: If the assessor's information is found to include lower level or finished attic in their gross living area classification for taxing purposes, the information will appear differently in the report so the appraiser can display the properties in compliance with secondary market guidelines for above grade living area, and gross living area. The subject and all comparables will be displayed in the same fashion. Some of these areas are estimated by the appraiser based on the information available through online sources. The MLS pulls data in from public record and may also reflect the incorrect above grade gross living area. Finished secondary areas may be estimated based on available information. Basement garages are sometimes included in the assessor's basement area and in these cases the basement area will appear correctly in the grid. If closing date on mls is different than the closing date on public records, the date on public records will prevail

-The appraiser has provided a sketch to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size. Estimations and rounding may occur, and the sketch is limited by the software used to create it.

-The appraiser reserves the right to revise quality and or condition ratings between assignments when additional information becomes available, or peer review and industry interviews indicate a majority opinion of standardization. This will not have an adverse impact on any current or past valuations as this only impacts the formatting of the report and not the opinions formed by the appraiser based on a visual observation of the units in question.

-There are many online sources for real estate data and they do not all agree. The appraiser makes a determination as to which sources are most credible and utilizes the information in the report. Primary sources are the multiple listing services and town/city records. Secondary sources will be The Warren Group/Commercial Record, LoopNet, and local brokers. With the exception of the brokers, these are all paid membership services because the data is widely viewed as accurate

-Highest and Best Use: The improvements are legally permissible, physically possible, financially feasible and likely most profitable based on market demand for the neighborhood. The present improvements contribute to the value of the subject property so that its value is greater than the estimated vacant site value.

#### **ADU Questionnaire**

# solidifi

#### Accessory Unit (ADU) Questionnaire

Please address the following and attach this questionnaire to the appraisal report if the subject property is improved with an ADU, <u>or</u> is a SFR with a second kitchen, <u>or</u> there is living space separated from the main dwelling:

#### YES NO

- Does the subject have an Accessory Dwelling Unit (ADU)?
  - If no, check all that are applicable to explain why:
    - The additional living area is not independent of the primary dwelling unit.
  - The additional living area does not include a fully functioning kitchen.
  - The additional living area does not include a fully functioning bathroom.
- □ □ □ □ □ □ □ □ Is the ADU/additional living area separately metered?
- Is there interior access between the primary dwelling unit and the ADU/additional living area?
- □ IX Is there exterior access to the ADU/additional living area, independent of the primary dwelling unit?
- Are ADU's/additional living areas typical for the market?
- □ □ Is the ADU/additional living area rented?
- Does the ADU/additional living area comply with Zoning?
- If the ADU is legal per zoning, does the appraisal include at least one comparable with the same use?
- □ If the ADU is <u>not</u> legal per zoning, does the appraisal include at least 3 comparables that have the same non-compliant zoning use?

If the subject has an ADU as defined by FNMA, please ensure the report conforms to the following requirements:

- 1) The 'One with Accessory' box must be checked in the improvement section.
- 2) For assignments with an interior inspection, interior photos of the ADU must be provided.
- 3) If the ADU is legal per zoning, the report must demonstrate that the improvements are typical for the market through an analysis of <u>at least one</u> comparable property with the same use (e.g. ADU amenity must be bracketed in the grid).
- 4) If the ADU is not legal per zoning, the report must demonstrate that the improvements are typical for the market through an analysis of <u>at least three</u> comparable properties that have the same noncompliant zoning use.
