April 18, 2021

Dear Wilton Board of Selectmen, Conservation Commission, and Parks & Recreation,

The Norwalk River Watershed Association requests permission to proceed with the proposed small meadow project at Allen's Meadows, organized by Wilton resident and volunteer Joe Bear.

NRWA will sponsor the project and help oversee the stages of work to be done primarily by Joe and another fellow community gardener Jamie Van Acker, while abiding by the Cornell Cooperative Extension outdoor volunteer work guidelines for safety during the pandemic.

NRWA will submit a renewed certificate of insurance covering the town for this volunteer work by April 20, 2021.

Thank you for the chance to help restore this section of the Allen's Meadows as part of the Pollinator Pathway.

Sincerely,

Louise Washer  
President, Norwalk River Watershed Association  
Pollinator Pathway Northeast Steering Committee
