Allison, Attached are some photos of the generator air intake louver installed in the in the rear wall on the Wilton Congregational Church. During our Historic District Commission meeting last Sumer, you wanted to be notified so your members could take a look and decide if the lattice barrier would be necessary. We are still in the construction stage, but they are welcome to stop by. There is still some final patching-caulking and painting to be done. Let me know if you would like any additional information. The handicap ramp is temporary until the construction is complete and the ramp and railing can be installed in the original location. Regards, Giff Broderick for the Wilton Congregational Church.
