Sure. It automatically said he was away.

I see their logic of the application, and am on record about the poor sight lines there. In fact, I watched during COVID when they changed the grading at least twice during construction to keep shaving away at the hillside, I kept saying to my fellow walkers in my family that they are clearly going to come back about the second driveway.

But, as you recall, this was such a big deal with P and Z when this was approved. There were those who thought some other application with other curb cuts would be coming later for the balance of the acreage.

Barbara –

I believe Michael is in the office today, but will be on vacation starting tomorrow.

I have copied him into this email. He hosts the Zoom Meetings and should be able to let you in to speak at the appropriate time.

I'm sure he will contact you if he needs additional information.

Thank you.

Lorraine Russo

Hi Lorraine and Daphne,

Michael is apparently away. I just wanted to be allowed to speak this evening at ZBA.

Is that possible?

Hi Michael.

I would like to reserve the right to speak tonight. My husband Jonathan Wooten and I got the notice for the meeting tonight.

The matter is the driveway for 250 Cannon Road. At P and Z, this took a very long time to create an approval. The second driveway for the fifth house was because only four homes can be served by a private curb cut in an as-of-right situation. There is no question that getting decent site lines with the slope there and speed of cars was a longstanding issue with P and Z and is a challenge for this development.

Let me know if this is possible,

Barbara
